LeetCode | GitHub | LinkedIn

Summary

Computer Science student with a strong foundation in full-stack development, data structures, and algorithms. Experienced in contributing to large-scale open-source enterprise systems and building reliable, production-ready solutions. Demonstrated problem-solving ability through extensive competitive programming practice and consistent high performance on LeetCode. Currently working as a Product Engineer Intern at Juspay, focusing on AI-powered search solutions.

Experience

Product Engineer Intern

Mar. 2025 – Present

Juspay Technologies Private Limited

Bangalore, India

- Developing Xyne Project, an open-source AI-powered search and knowledge engine for enterprise workspaces
- Contributed 85,000+ lines of code and submitted 100+ pull requests, improving product stability, modularity, and developer experience
- Optimized query latency and developed scalable backend integrations across multiple data sources including Slack, Google Workspace, and GitHub
- Worked on cross-platform mobile app development (Android & iOS) for Xyne using modern app frameworks, enhancing accessibility and user experience
- Integrated LiveKit to build real-time audio/video calling functionality with low-latency WebRTC communication
- Implemented live speech-to-text transcription during calls by streaming audio tracks to STT pipelines
- Handled signaling, room lifecycle, participant events, and reconnection logic to ensure stable call experiences
- Worked with TURN/STUN configuration and ICE debugging to improve call reliability across networks

Projects

InstaGO | *MongoDB, Express.js, React, Node.js*

2024

- Built full-stack platform enabling university students to book electric vehicles with secure JWT-based authentication
- Designed responsive UI using React and Material-UI promoting sustainable transportation

Movie Ticket Booking System | *C, Data Structures and Algorithms*

2023

- Developed C-based ticket booking system with movie listings, showtimes, and user booking management
- Applied file handling for persistent data storage and optimized algorithms reducing processing time by 40%

Technical Skills

Programming Languages: C, C++, JavaScript, TypeScript

Backend Technologies: Node.js, Bun, Hono, Express.js, PostgreSQL, REST APIs

Frontend Technologies: React, HTML5, CSS3, Xstate

Mobile App Development: Android SDK, iOS Development, Cross-Platform App Design

Tools and Platforms: Git, Docker, Vespa, Linux

Core Competencies: Data Structures and Algorithms, System Design, Full-Stack Development, Problem Solving

Achievements

LeetCode Knight Rank | *Global Rank: 8,800, Rating: 1,870+*

- Solved 1,300+ algorithmic problems demonstrating advanced proficiency in data structures and algorithms
- Participated in 50+ coding contests, consistently performing in top percentiles globally

University Coding Academy (UCA) | *Top 80 of 3,000 Students*

- Selected for elite coding program based on exceptional problem-solving skills and competitive programming

Education

Chitkara University

Bachelor of Engineering in Computer Science; CGPA: 9.39/10.0

Punjab, India

Aug. 2022 – May 2026
